HYB 153-06 Anti Nitrite Oxidoreductase (α -NOR)

Mouse monoclonal antibody

Article No.	63154 (0.2 mL), 101088 (1.0 mL)	
Product Name	HYB 153-06 Anti Nitrite Oxidoreductase (α -NOR)	
Clone	7G8	
Subclass	IgG1 / Kappa	
Description	Preparation:	Protein-A purified
	Concentration:	1 mg/mL \pm 10%, based on A ₂₈₀ * See Certificate of Analysis for details.
	Solvent:	PBS, pH 7.2 – 7.4
	Storage:	-18 °C or colder
Antigen	Nitrite Oxidoreductase (NOR) is an enzyme catalysing the oxidation of nitrite and is located at the inner side of the cytoplasmic and intracytoplasmic membranes of <i>Nitrobacter</i> species (1). NOR from <i>N. hamburgensis</i> (2) consists of at least two major subunits, α -NOR and β -NOR, with molecular masses of approximately 130 kDa and 65 kDa, respectively. The <i>Nitrobacter</i> species are gram-negative microorganisms ubiquitous in nature and gain energy from the oxidation of nitrite to nitrate.	
Immunogen	Nitrite Oxidoreductase purified from <i>N. hamburgensis</i> .	
Specificity	α -subunit of NOR from <i>N. hamburgensis</i> X14, <i>N. winogradskyi</i> Engel, <i>N. vulgaris</i> T3, <i>N. alkalicus</i> AN4 and <i>N. BS 5/6</i> .	
Epitope Specificity	HYB 153-06 Anti Nitrite Oxidoreductase (α -NOR) clone 7G8 reacts with a different epitope compared with HYB 153-02 Anti Nitrite Oxidoreductase (α -NOR) clone 1C4.	
Reactivity	HYB 153-06 Anti Nitrite Oxidoreductase (α -NOR) clone 7G8 reacts well in ELISA coated with cell extract as well as in immunoblotting with a band of approximately 130 kDa corresponding to the α -subunit of NOR. HYB 153-06 Anti Nitrite Oxidoreductase (α -NOR) clone 7G8 was previously named HYB 153-02 Anti Nitrite Oxidoreductase (α -NOR) clone 7G8.	
Culture Medium	Dulbecco's modified Eagle's medium with 10 % fetal calf serum.	
Fusion Partner	X63-Ag8.653.	
Immunization	Female CF1xBalb/c F1 hybrid mice were immunized i.p. with immunogen.	
Application	Method	Usability
	ELISA	yes
	Immunoblotting	yes
	Immuno.fluoresc.	nd.
